

### Ispirer MnMTK 2020 - Oracle to MySQL

We had the first chance to use the auto-conversion tool above for a DB migration project. We used the tool for migrating 2 Oracle DB instances to MySQL. The outcome of using the tool was beyond expectation as it helped us to significantly reduce manual effort and shorten the timeline with high accuracy.

Thanks to Ispirer for providing such a useful tool for DB migration projects and I would recommend to anyone having the same kind of project to use the tool for effort/cost saving, and to mitigate risks/challenges

Hope to work with Ispirer again in the future.
