To Whom it May Concern:

Susquehanna Information Systems is committed to mid-sized companies. Our goal is to offer our customers the best available human capital for mid-sized companies running a wide variety of industry applications and to help grow your business. We have chosen to concentrate on mid-sized companies with a range of offerings in the mainstream of major industry initiatives.

Susquehanna Information Systems partnered with Ispirer Systems in September, 2015 with the utilization of Ispirer MnMTK tool. Our customer is a large food company in confections that involved the source DB2 Database in the IBM iSeries (AS/400) environment running JD Edward World Financial and PRISM Customer Order Management Applications with the objective through Ispirer SQLWays Wizard to the target database in MS SQL Server. The process involved editing all Applications to Formatted Dates then through SQLWays Wizard (utilizing ODBC) are migrated to MS SQL Server. Data was verified by both our JD Edwards and MS SQL Server Database Programmer with minimal surprises. The SQLWays Wizard tool proved itself as intended: a resounding success!

We provide Day 1 IT Application Knowledge and Expertise with our team of Local, Regional and National Resources focused on Custom Application Development, Application Integration, EDI, and Business Intelligence (BI).

Should you have any questions, please do not hesitate to contact me at (610) 375-4813.

Thank you.
